Updates for XML DNS after full implementation at LPL:

Last update 9/11/08

Kerberos records for systems as a segue into NFSv4 support

SPF records for himails

Round-Robin DNS for himail1/himail2

Round-Robin DNS for pirlmail1/pirlmail2
    nope. pirlmail cname should eventually point to pirlmail1, no round robin.
    pirlmail2 will just bring up an ip address of pirlmail1 if it needs to be brought up.

Round-Robin DNS for hirise.lpl.arizona.edu

Round-Robin DNS for pirlwww.lpl.arizona.edu

Round-Robin DNS for VPN servers.

IPv6 records published on SonettNet
